

# TECHNOLOGY PROCESS ASSESSMENT

## Improve Workflow | Increase ROI

Are you taking full advantage of the value of your digital design software to increase efficiency and productivity? Our Technology Process Assessment (TPA) delivers concise recommendations to improve your processes and provide an immediate return on investment. By working with our team and leveraging our direct partnership with Autodesk, you are guaranteed that the very best people are focused on recognizing and solving your technical challenges, to help you maximize your software investment and save valuable time.

Our TPA uncovers challenges you are having with your design technologies, including those you may not have encountered yet. Together we'll develop a plan of action to address and overcome these challenges. Your final deliverable is a comprehensive analysis document with our expert observations, experienced commentary and actionable recommendations, providing a roadmap for your success.

## Let's Tackle Your Business Challenges

- You aren't getting the desired ROI from your software investment
- You've purchased software but haven't implemented it yet
- Missed deadlines are an issue due to re-work or technology issues
- Employees are frustrated with implementation and learning curve
- You've transitioned to a 3D modeling software like Revit or Civil 3d, and want to realize more down-stream benefits

## We'll Optimize

- IT infrastructure
- Workstation hardware
- File and folder structures
- Standards and templates
- Project workflows
- User abilities
- Employee perceptions and feedback

## You Reap the Benefits

- Reduced project rework
- Consistent and streamlined project templates, standards and content
- More time for design intent and client interaction
- Increased automation that leads to improved efficiencies
- Leadership alignment with the design teams
- Help make the transition to 3D and start leveraging the benefits of modeling
- Seamlessly roll out learning paths
- Evolve workflows and processes to use model data more efficiently

## Our Process

Our detailed assessments include targeted interviews with project team members at all levels - from leadership to production - surveys, project reviews, standards reviews and a thorough analysis of all data collected. The final assessment document will provide a roadmap for success.

### Phase 1 - Kickoff

- ⦿ Expectations aligned
- ⦿ Process reviewed
- ⦿ Schedules confirmed

### Phase 2 - Data gathering

- ⦿ File exchange
- ⦿ Questionnaire
- ⦿ Surveys

### Phase 3 - Interviews

- ⦿ Meetings with key personnel

### Phase 4 - Analysis and write-up

- ⦿ Analyze data
- ⦿ Document observations
- ⦿ Provide recommendations

### Phase 5 - Delivery

- ⦿ Present to leadership
- ⦿ Deliver assessment document and raw data

## Timeline

- ⦿ Your TPA will typically be delivered within 8 weeks of kickoff.

## Pricing

**Tier I:** For companies and agencies with one office location and are focused on one design discipline - \$4,800

**Tier II:** For companies and agencies with up to two office locations and are focused on up to three design disciplines - \$8,800

**Tier III:** For companies and agencies with multiple office locations and are focused on many design disciplines, we can develop a customized solution
